

Synopsis

Alpex Marine (Pvt) Ltd; is a 100% export oriented Board of Investments (BOI) approved company, which is engaged in the processing of shrimps and other seafood products for export. It is a company that fully established & operational in the export market.

Fifteen weeks of in-plant training was productively carried out in the processing field of Alpex Marine (Pvt) Ltd.

The training session was concentrated mainly on functional responsibilities and importance of seafood processing field, as well as quality management procedures and practices in seafood exporting field.

Those expectations could be achieved through active involvements of the process in the establishment with advice and guidance provided by the responsible people in the relevant sections.

At the same time, I could have good inter relationship with staff in the premises. The SWOT analysis and the suggestions for the company are the outcomes of those inter communications. Those products have been mentioned under discussion section of my report.

Some of the other processed seafood products available in export market are referred in addition.
